THE REVIEWS ARE IN!

Brenda N. ★★★★★
Just the best! I have used Dan and his crew several times and I will always call them first!

La M. ★★★★★
Luis and his crew are definitely an asset to Old World, they were professional, honest, respectful and worked on my home with integrity. Thank you Luis!

Allen A. ★★★★★
I won't use anyone else!

IS YOUR ROOF VENTILATED?

ROOF VENTS CAN PREVENT MOLD GROWTH BY INCREASING AIR CIRCULATION BETWEEN THE ROOF AND ATTIC.

CONTACT US TODAY FOR HELP WITH ROOF REPAIR OR REPLACEMENT.

How do mortgage interest rates work?

Loan payments vary depending on the type of loan selected.

When you have a mortgage, you pay interest on the unpaid loan amount. There are two main types of mortgages: fixed-rate (with a constant interest rate) and adjustable-rate (with a changing interest rate). As you pay off the loan principal, the monthly interest decreases.

HOMEOWNER
Winter Maintenance
TIPS

#1
Clear the debris.
To prevent damage to your property from branches during strong winds or storms, it is important to remove any debris or branches near HVAC units, gas meters, basement windows, and dryer exhaust vents. Cutting back dead or dying limbs and branches that could come into contact with the roof or siding is also recommended.

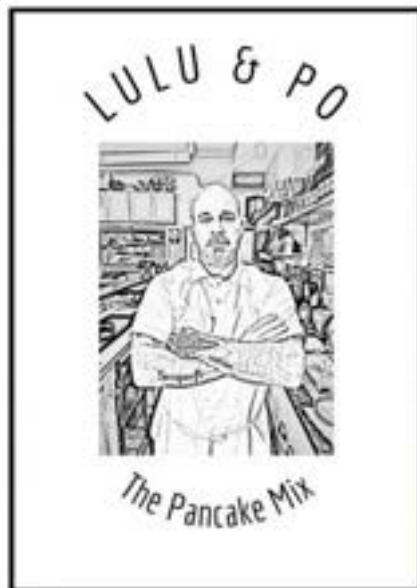

#2
Inspect your roof.
Regular roof inspections and maintenance are crucial to prevent any missing or damaged shingles. Gutters should also be clean and securely attached to prevent ice dams. Consulting a roofing professional is recommended if any issues are found.

#3
Prevent visits from pesky pests.
To prevent rodents and pests from entering your home during the winter months, check the foundation for any small cracks or openings and seal them up.

5 SIMPLE STRATEGIES FOR SWEET SLUMBER!

Schedule your sleep time:
Get cozy with a regular sleep routine and listen to the rhythm of your body clock guiding you toward rest.

Find your zen state of mind:
Stay calm, read on, and use a bubble bath bomb. Whatever it is, find your favorite way to wind down for the night.

Invest in sleepy success:
Whether you need a fan, a firm mattress, blackout curtains, or a noise machine to fall fast asleep, do yourself a favor and invest in your rest!

TTYL:
Limit the late-night binging of TV, Instagram feeds, and all other screens. That blue light interferes with your body's way of producing melatonin, a hormone that regulates sleep.

Healthy habits, healthy sleep:
Exercise can improve sleep, but avoid intense workouts before bed. Be careful of sleep disruptors like caffeine, alcohol, smoking, and heavy meals. Opt for a light snack if you're hungry at night.
